

MIRAVIT® concept
for pig

MIRAVIT

Keeps your animals fit.

MIRAVIT® - presented by the AGRAVIS Raiffeisen Group

What is MIRAVIT®?

It is a concept that comes from many years expertise in the field of practical nutrition.

This experience allows us to elaborate a product range and natural solution for the critical period.

Our mission is to walk on your side in the daily business.

We help you growing with unique, innovative, selected and advanced feeding tools.

MIRAVIT

Keeps your animals fit.

Piglets

Period / Challenge	Solution	Description / Characteristics
Newborn weak piglets	MIRAVIT® Pig LifeStart	Energy paste with vitamin and colostrum
Diarrhoea and negative side effects	MIRAVIT® Vitalyt*	Enterococcus faecium and electrolytes
	MIRAVIT® LactAcid	Powder mixture of organic acids

Sows

Period / Challenge	Solution	Description / Characteristics
Fertility	MIRAVIT® Carotin 8000	β-carotene supply
	MIRAVIT® Sauenbooster	Energy boost
Vitality	MIRAVIT® VitalExtra*	Micronutrients and vital ingredients in dry form

Fattening Pigs

Period / Challenge	Solution	Description / Characteristics
Development phase, mineral imbalances	MIRAVIT® CalPhos / Calcidiol (D3)	2-component Ca-P-D3
Respiratory system	MIRAVIT® Eukamint liquid*	Essential oils
	MIRAVIT® Eukamint powder	
Vitality	MIRAVIT® VitaAqua plus*	Micronutrients and vital ingredients in liquid form
Gut health, feed hygiene	MIRAVIT® L-cid standard*	Liquid mixture of organic acids
	MIRAVIT® PigCid*	Liquid mixture of organic acid – not for drinking water!

* can be used also for piglets, sows and fattening pigs.

MIRAVIT® Pig LifeStart

Energypaste for newborn piglets to supply with energy and vitamins

- Special treatment for weak newborn piglets
- Increases the vitality of piglets
- Improves thermoregulation and physiological activities

Composition

Fish oil; lactose; colostrum; egg powder; propylen glycol; yeasts and vitamins

Dosage

- 2 ml Pig LifeStart per piglet immediately after birth
- For very weak and small piglets distribute an extra dose after one day.

Packaging

- Box with 6 tubes of 100ml.

MIRAVIT® Vitalyt

Complementary feed to compensate electrolyte imbalances

- Supports piglets during digestive problems
- Available energy source after weaning
- Enterococcus stabilizes the intestinal flora of young pigs

Composition

Dextrose; sodium bicarbonate; sodium chloride; potassium chloride; vitamins and Enterococcus faecium

Dosage

- Piglets: 50 g Vitalyt / litre drinking water
- Sows: 2 – 3 l/sow at a concentration of 50 g Vitalyt / litre water
- Fattening pigs: 50 g Vitalyt / litre drinking water

Packaging

- 5 kg bucket and 25 kg bag.

MIRAVIT® LactAcid

Mixture of organic acids in powder form

- Prevention of health problems caused by lack of feed hygiene
- Stabilises gut health

Composition

Lactic acid; formic acid ; fumaric acid ; sorbic acid; ammonium formiate; citric acid

Dosage

- 5-10 kg per tonne of dry feed (0.5-1.0 %) on top

Packaging

- 25 kg bag

MIRAVIT® Carotin 8000

Complementary feed to improve β-carotene supply of sows

- Contains a high-value vitamin complex to stabilise performance
- Leads to improved signs of oestrus and fertilisation results

Composition

Apple pomace ; linseed meal; beet molasses; β-carotene and vitamins

Dosage

- 40 g per sow and day for 1 week

Packaging

- 10 kg bucket; 25 kg bag

MIRAVIT® Sauenbooster

Complementary feed for sows to increase fertility and vitalisation during birth and post-natal phase

- Additional energy boost (flushing)
- Increases the vitality of newborn piglets
- Provides protein and micronutrients in times of high strain

Composition

Dextrose; sugar; barley; soya protein concentrate; fruit pulp; soya beans; soya grist; linseed, monocalcium phosphate; wheat grist; calcium carbonate; sodium chloride; trace elements; vitamins and organic acids

Dosage

- Young sows:
 - 250g per sow and day for 10 day before insemination
- Sows:
 - 300g per sow and day, 10-5 days before littering until 2-3 days after birth
 - 300-500g per sow and day, 5 days before weaning until insemination

Packaging

- 10 kg bucket, 25 kg bag

MIRAVIT® VitalExtra

Mineral feed to increase the vitality of pigs

- Improves supply of vitamins
- Revitalisation after infection and diseases
- Stabilises animal health in stress situations

Composition

Yeasts; brewer grains; sugar beet pulps; sodium chloride; sodium sulfate; calcium chloride; Monocalcium phosphate; vitamins and trace elements

Dosage

- Piglets and fattening pigs:
 - 3-10 kg per tonne of dry feed
- Sows and boars:
 - 50 g per day

Packaging

- 25 kg bag

MIRAVIT® CalPhos/ Calcidiol (D3)

Two component liquid product for administration during critical growth phases

- Improves bone development
- Increases muscle tension
- Compensates mineral imbalances

Composition

CalPhos component: calcium, phosphorus

Calcidiol (D3) component: 25-Hydroxycholecalciferol, vitamin D3

Dosage

- Drinking water or liquid feed
- For digestive problems:
 - 1 ml CalPhos + 1ml Calcidiol per 10 kg body weight
 - 3 days of treatment - 3-day break - 3 days of treatment

Packaging

- 2x 5 litre canister

MIRAVIT® EukaMint liquid/ powder

Complementary feed based on essential oils in liquid or powder form

- Stimulates the appetite
- Stabilisation of the organism in stress situations and during climate changes
- Supports pigs during respiratory disorders

Composition

Mixture of flavourings

Dosage

- Miravit EukaMint powder: 300-500 g per tonne of dry feed, approx. 3 weeks
- Miravit EukaMint liquid: 150-200 ml per 1000 litre of drinking water or liquid feed

Packaging

- Miravit EukaMint powder: 5 kg bucket
- Miravit EukaMint liquid: 5 litre canister

MIRAVIT® VitaAqua plus

Liquid complementary feed to increase the vitality of pigs

- Improves supply of vitamins
- Revitalisation after infection and diseases
- Stabilises animal health in stress situations

Composition

Vitamins and trace elements

Dosage

- Piglets: 2l per 1000l of drinking water
- Sows, fattening pigs: 1l per 1000l of drinking water
- liquid feed: 0,75 l per tonne of liquid feed
 - > application duration 3-5 days

Packaging

- 5 litre canister

MIRAVIT® L-cid standard

Liquid mixture of organic acids, for use in dry feed, liquid feed or drinking water

- Reduces the pH-value of drinking water and feed
- Microbiological stabilisation
- Improves gut healths

Composition

propionic acid; formic acid; sodium formiate; lactic acid
> in total 66.6 % acid

Dosage

- 1-2 kg per 1000 litres of drinking water
- 1-3 kg per tonne of liquid feed
- 1-10 kg per tonne of dry feed

Packaging

- 25 kg canister; 200 kg barrel; 1000 kg IBC

MIRAVIT® PigCid

Liquid mixture of organic acids, for use in dry feed or liquid feed

- Reduces the pH-value of feed
- Microbiological stabilisation
- Improves gut health

Composition

propionic acid; formic acid; sodium formiate; lactic acid
> in total 60.5 % acid

Dosage

- 1-3 kg per tonne of liquid feed
- 1-10 kg per tonne of dry feed

Packaging

- 200 kg barrel; 1000 kg IBC
